

# BISHOP PINE

VINEYARDS

CABERNET SAUVIGNON

2021 CALIFORNIA

## THE CALIFORNIA BISHOP PINE

Bishop Pine ( *Pinus muricata*) is a pine tree native to California's coastal regions, where our family's vineyards and San Martin winery are located. Bishop Pine trees are resilient and able to grow in arid conditions and dry rocky soil.

## VINEYARDS

The same coastal climate that nurtures the native California Bishop Pine creates ideal conditions for vineyards to flourish, producing richly flavorful grapes. Our sunny, temperate climate allows grapes to reach full ripeness while preserving layered complexity. Our winemaking team, led by Christophe "Cris" Legrandjacques, selects grapes from vineyards across the state's growing regions that best exemplify classic California Cabernet varietal grape flavors.

## WINEMAKING

After the grapes were harvested, the juice was warm fermented in stainless steel to enhance color, tannins and rich fruit flavors. American oak used in aging to impart round mouthfeel and structure. The final blend was gently filtered prior to bottling.

Alc. by Vol. 13.8 %, TA 6.0%, pH 3 .70

## TASTING NOTES

Notes of rich dark fruit, followed by hints of mocha, spice and tobacco. Long finish with well balanced tannins, fruit and acidity.

## PAIRINGS

This wine pairs with a wide range of dishes. Try it with aged cheddar and rosemary crackers, rib-eye steak, or smashburgers.
